## Review

“Students and instructors alike will appreciate the closing material — questions, activities, readings and resources, etc. This provides the opportunity for individualizing and personalizing the learning process as well as provides a foundation for searching for more information in ways that supports the learner’s needs and interests.”

- Megan Purcell, Eastern Kentucky University

“I especially appreciate the bolded vocabulary throughout the chapters. The glossary of these terms is a great benefit to students. The headings and sub-headings help chunk the information, which in turn helps students organize their new learning.”

- Ann Bingham, University of Nevada, Reno

## From the Back Cover

This early childhood special education text provides a unique and much needed focus on the wide variety of professionals who work with young children with developmental delays.

This new text provides the tools and strategies special education teachers and therapists need to work cooperatively and effectively with other professionals. Readers are introduced to the terminology required for successful interaction with parents and providers of children with developmental delays, including the skills to enable parental involvement in a child's education. Included in this text are discussions of how special education professionals can work with daycare providers and preschool teachers to familiarize them with attributes associated with a variety of disabilities and early childhood special education services.

### Key Features:

- A focus on the variety of professionals who provide early childhood intervention services helps readers become knowledgeable about the intervention methods used by each type of service provider.
- Individual chapters on laws and litigation (Ch. 1), assessment (Ch. 2), play (Ch. 12), behavior management (Ch. 13), and transitions (Ch. 14) provide an in-depth look at these crucial aspects of early childhood special education.
- Theories of child development are integrated and applied throughout all chapters, helping readers understand typical and atypical development.

### About the Author

Linda Dunlap is a professor of psychology. She has taught psychology and education courses since receiving her Ph.D. from the University of Iowa in 1980. She served as a part-time faculty member at State University of New York at New Paltz, Dutchess Community College, and Ulster Community College in New York from 1980 to 1984. Since 1984, she has served as a full-time faculty member and chair of the psychology department (1984-2005) at Marist College in Poughkeepsie, New York. In addition, she served as a child development specialist for the Saint Francis Hospital Preschool Program in Poughkeepsie from 1986 to 1994. This program provides services for children 2 to 5 years old who have developmental delays. Dr. Dunlap served as a board member and executive officer for the Dutchess County Child Development Council. She frequently contributes to articles in national newspapers and magazine focusing on child development, teacher education, and parenting issues. She has also served as a consultant for local school districts. In addition, she has written two other textbooks, *What All Children Need and Theory and Application*, (University Press, 2nd ed. 2005) and *Psychological Testing Across the Lifespan*. (Prentice Hall, 2008).

## **PDF**

This new text for early childhood special education pre-service and in-service teachers provides a unique and much needed focus on how to collaborate effectively with the wide variety of professionals who work with young children who have developmental delays.

Rather than limit discussion to the types of developmental disabilities young children may experience and the role of the special education teacher, this new text explores the wide variety of professionals across disciplines who provide services to children with disabilities. In depth coverage of the history of early childhood education, special education, and litigation related to special education services and the importance of use of non-biased, highly effective assessments, combined with an overview and of major theories, their application, and an extended discussion of health-related contributors to disabilities (e.g., HIV, alcohol, cocaine) related to early childhood development all combine to make this text unique in its field.

This text provides dedicated special education teachers and therapists with the tools and strategies needed to work cooperatively and effectively with other professionals. As part of the fundamental focus of this text, readers are introduced to the terminology needed to effectively interact with parents and providers of service of children with developmental delays, giving them the skills to enable parents to be actively involved in and contribute to their child's education. Of particular interest to readers will be the discussion of how special education professionals can work with day care providers and preschool teachers so they become familiar with attributes associated with a variety of disabilities and early childhood special education services.

Highlights of this First Edition:

- Focuses on a variety of professionals who provide early childhood intervention services, helping readers become knowledgeable about the jargon and intervention methods use by the wide variety of professional who work with young children with special needs.
  - 5 Unique separate chapters on laws and litigation (Ch. 1), assessment (Ch. 2), play (Ch. 12), behavior management (Ch. 13), and transitions (Ch. 14) provide an indepth look at these crucial aspects of early childhood special education.
  - Theory of child development is integrated/applied throughout all chapters, helping readers understand typical and atypical development.
  - Instructor's manual provides general teaching tips, chapter objectives, key terms, student activities, lecture materials, suggested additional readings, related websites, agency information, video/DVD suggestions, assessment items (true/false, matching, fill-ins, multiple choice, essay and item directions), and is designed to represent "best practices" in the field of measurement and evaluation

Not professionally written

By Graduate Student

Unfortunately, if you are like me usually you have no choice as to the text that you must buy for your university studies. However, if you are a professor browsing text on the subject of Spec. Ed., don't make the dire mistake of choosing this one. So far, information has been blatantly incorrect. In addition, the style of writing is unclear and has many run-on sentences. Also, it is not organized in a coherent way.

Well thought out, and informative

By Teri Werking

I am a nurse working in early intervention. This is a great resource book for the provider working with children with disabilities and developmental delays. I like the way she talks about all subjects from Autism, to hearing loss, to motor delays, to fetal alcohol syndrome, to speech and language delays, and to the importance of play. She talks about occupational therapists and how they can adapt equipment to help modify the problem: whether it be eating, motor or cognitive. She gives overviews of Spina Bifida, amputations, multiple sclerosis, muscular dystrophy, cerebral palsy, and visual impairments. If you are out in the trenches working with the children, you realize how valuable this book really is. I don't think as a student sitting in a classroom you can appreciate it.

Great book! A must have for providers working with children with disabilities.

Early Children Special Education

By Kathy S. Rudd

The Book was in good shape. I don't have any complaints about the book or the sender. I could not track it properly, but it came before the time indicated. I will use them again if needed.
