## About the Author

Dr. Douglass reveals medical truths, and deceptions, often at risk of being labeled heretical. He is consumed by a passion for living a long healthy life, and wants his readers to share that passion. Their health and well-being comes first. He is anti-dogmatic, and unwavering in his dedication to improve the quality of life of his readers. He has been called "the conscience of modern medicine," a "medical maverick," and his medical experiences are far reaching—from battling malaria in Central America - to fighting deadly epidemics at his own health clinic in Africa - to flying with U.S. Navy crews as a flight surgeon - to working for 10 years in emergency medicine in the United States. This dedicated physician has repeatedly gone far beyond the call of duty in his work to spread the truth about integrating the best science-based medical therapies from all medical disciplines ("alternative medicine"). For a full year, he endured economic and physical hardship to work with physicians at the Pasteur Institute in St. Petersburg, Russia, where advanced research on photoluminescence was being conducted. These learning experiences and his keen storytelling ability and wit make Dr. Douglass' numerous books on this website and his newsletters - *The Douglass Report* and *Daily Dose* - uniquely interesting and fun to read. He shares his no-frills, "no-bull" approach to health care, often amazing his readers by telling them to ignore many widely-hyped good-health practices (like staying away from red meat, avoiding coffee, and eating like a bird), and start living again by eating REAL food, taking some inexpensive supplements, and doing the pleasurable things that make life livable. Readers of Dr. Douglass' books and newsletters get all this, plus they learn how to burn fat, prevent heart disease and cancer, boost libido, and so much more. And Dr. Douglass is not afraid to debunk latest research reports that are published, and share the real story with his readers. He has led a colorful, rebellious, and crusading life! Not many physicians would dare put their professional reputations on the line as many times as this courageous healer has. A vocal opponent of "business-as-usual" medicine, Dr. Douglass has championed patients' rights and physician commitment to wellness throughout his career.

Eye Opening

By A Customer

I was amazed at the level of detail. It's heavily documented, which is refreshing in an alternative medicine book. In fact, if what Dr. Douglass says is true (and I'm pretty confident it is), then the mainstream medical establishment has a lot of explaining to do about why they have rejected and ignored light-based therapies that have produced excellent, well-documented clinical or double-blind results over the course of a century.

He also does an excellent job in not overselling his claims. He pulls no punches about when and where the therapy failed to work. When it does work, he also doesn't hold back in his enthusiasm. Some might be put off by this last fact, but I think his presentation is well-balanced, overall.

My only criticism is that, while most documentation is excellent, I wish the author had paid a bit more attention to completing all of his references. I have a second edition copy, which includes a reference on page 232 to something called, *\_AIDS - The End of Civilization\_*, Chapter 6. Unfortunately, there are no other descriptions of that book that I could find, such as who wrote or published it. I learned later that it was another book by the same author, but that fact should have been included in the reference.)

Another example of an inaccurate reference is on page 236, where he mentions a blue light therapy performed on a little girl in Chapter 14. Unfortunately, Chapter 14 is about a doctor with AIDS and how he has dealt with this personal crisis. It has no reference to either blue light therapy or the little girl.

Such mistakes aside, the overall value of the book is tremendous. I recommend it heartily to anyone whose mind isn't closed like a steel trap.

I also recommend another book by the author called *Hydrogen Peroxide, Medical Miracle*. The two books should really be considered companions of each other.

Factual history and indications of this excellent therapy

By Kenneth J. Dillon

Dr. Douglass is a leading American expert on Photoluminescence (aka Blood Irradiation, Biophotonic Therapy, etc.). In this book he provides a great deal of very useful original source material from the early American clinical trials of this formidable therapy. He has travelled to Russia to consult with physicians there and includes some material from recent Russian sources as well. The book is written in an engaging style, with many insights into topics related to this therapeutic use of the chemiluminescent property of human blood cells. The abundant evidence from this book makes it clear that mainstream medicine has allowed an excellent therapy to slip through the cracks. Readers may also wish to consult George Miley, "Ultraviolet Blood Irradiation" and my "Healing Photons" as well as our Website--[biophoton.com](http://biophoton.com). Kenneth J. Into the Light

By Michael Monji

DR. Campbell's book "into the Light" is fantabulous. On a scale of 1 to 5, it is a 20. It is a must read if you believe in alternative medicine. It is sad that we can't get the FDA to approve of this life-saving treatment. This treatment saved my mother's life when conventional medicine put her in the hospital 4 times within one month.

In addition, this treatment saved my wife's life when she came down with Valley Fever. It also saved me from having heart surgery for an irregular heart beat. I am so grateful that I will not need that expensive and possibly fatal surgery. Anyone that says the treatments that Dr. Campbell recommends do not work has not really done any research on UVBI or H2O2 treatments.

When all else fails, then try a UVBI & H2O2 treatment as stated by Dr. Campbell.
