Unusual insights into kids' problems.

By B. Wolinsky

One of the real-life cases in this book was a six year old boy who liked girl stuff; dolls, girls' clothes, playing with the girls at school and not the boys. It drove his mother crazy, infuriated his father, and left them tearing their hair out trying to get him to do gender appropriate things. He loved going to the home of a cousin of the same age, so he could play dress-up in her clothes. If you're wondering, the answer is yes, his aunt and uncle were seriously creeped out!

I don't know when this was written, but transgender kids are all over the news nowadays, being interviewed by Barbara Walters. Twenty years ago, however, the parents would not have been encouraged to allow their son to wear a dress to school. The chapter, as with all others, comes with questions to ponder, such as how you'd feel in the clothes of the other gender, and having to do gender stereotyped activities. Would you feel bored? Out of place? Generally uncomfortable?

There are more cases in this book, equally important, mostly involving children. Some involve anxiety that keeps kids out of school, or teenagers with PTSD. All of them are worth reading, because they're all the kind of things that a therapist will deal with. No theories here like in the usual psychology textbook, no going on and on about Vygotsky, Freud, and Piaget. These are the real things that a therapist will deal with.

But the case of the transgender kid was probably the most interesting. Obviously, at the time it wasn't acceptable, so the parents weren't going to take a "live and let live" approach. A follow up to this case would be in order, because there have no doubt been new cases of this where the therapist suggests a different approach.
