NUMBERS AND UNITS IN OLD TAGALOG BY JEAN-PAUL G. POTET PDF

No doubt this book will meet the demand of historians, linguists, mathematicians, numismatists, philippinologists and tagalists as well as all the readers interested in the unusual. Like the 1992 article on which it is based, this book is the first one in English to broach the difficult subject of numeral expressions in Old Tagalog and the various concepts and measures associated with them. The book is about ten times as long as the article because it comprises a lexicon that deals with gold, money, taxes, usury, units of measurement, etc. Examples are numerous and generally drawn from such classics as the grammar of San Joseph (1610), Pinpin's manual (1610), the dictionaries of San Buenaventura (1613) and Noceda & Sanlucar (1754, 1860). Differently from the majority of publications on Tagalog, all the terms and examples are fully accented according to a precise system developed by the author, and explained in an appendix.
