MUST HAVE

By FranO

I graduated college with a 3.2 GPA. I was a hard working and loved nursing. I took a Kaplan course the week after I graduated. I did 1,000s of question on Kaplan. Took my test- 265 question and failed! I was crushed. Used Kaplan again. studied hard. test #2, 143 questions, failed. At a loss, I bought a Lippincott book. Had only Q&A, no content. Did over 1/2 the book and took the test again. test #3, 265 questions and failed.

At a complete loss, I researched what i should do. I was certain i was never going to pass. I was studying so hard and could not seem to pass the test. I bought this book on amazon and fell in love with it from the very beginning. Each chapter had 10-30 pages of content and then questions pertaining to the content at the end of the chapter. The cd has 1,000s of questions, tests, and practice questions.

I walked into the test last week, extremely nervous. Having finished this entire book, I knew there was nothing more i could have done. I started the test, hoping for 265 questions again, as i thought that was the only hope i had of passing. You cannot even imagine my surprise when the computer shut off at 75! I was beyond shocked! I cried there in the testing center! Then went home and waited 2 days. I was shaking when i logged on to see! AND I PASSED! i am 100% sure that this book is the reason I passed. I am so grateful i

found this book! A must buy!

The ONLY NCLEX Review You Really Need!

By Stephen Pullin (SPullin@yahoo.com)

I purchased the 4th edition of this book about a year ago, and started using it in earnest about four weeks before the boards. The chapters that specifically discussed the exam structure, and how to truly "read" each NCLEX question, were essential. The content review chapters (the bulk of the book) were brief but comprehensive. The questions at the end of each of those chapters provided thorough rationales for the correct answers, as well as reasons why the incorrect answers were just that.

The accompanying CD provided valuable feedback regarding areas of strength and weakness. While it is good to have as many practice questions thrown at you as possible in book form, the CD challenges you in the way you will be tested; i.e., on the computer. So when the big day comes, you will be ready for the style of the NCLEX as well as its substance.

Two quick tips regarding the boards: 1) Schedule them for a time of day when you are at your best. If you are not a morning person, late morning or early afternoon test times will probably work better for you. 2) Study thoroughly, but it is better to finish your studies two days before the exam. Give yourself the day before to clear your head and relax (yeah, right!) on the eve of the boards. If you do not know the material by then, you are probably not going to learn it the day before.

I cannot recommend this book highly enough. I passed my boards at 92 questions, thanks in no small part to Ms. Silvestri's book. Many thanks to her, and best of luck to all of the soon-to-be nurses.

A Must Have for the NCLEX

By Oklahoma Amazon Primer

This is a good book to review all the material comprehensively after completing nursing school and studying for the NCLEX. I would find it difficult to memorize this material straight from the book; without having learned it before. What is it good for? During nursing school, this book will summarize what you REALLY need to know about disease conditions and how to perform procedures and such. Its the short version. But if you want in-depth details you need to go to the book.

What's it good for on NCLEX? This book helped me to see the material I learned from in NCLEX perspective and helped give me a mindset for what to look for. After taking the NCLEX I can say this book DEFINITELY helped me on most questions to say --- that's DEFINITELY the answer. I believe it helped me see right through NCLEX's hidden topics within the question.

I breezed through NCLEX first time with 4 days of studying after graduation in 85 questions.

So how do I know it works? (I only had 4 days to study because of a family event that happened.... but in those 4 days I read this book from 7am-1am the next day for 3 1/2 days; I read the ENTIRE book). I also used it during nursing school and made a 3.72 GPA; this book was awesome and I always recommended it to others.

The book gave me the REVIEW I needed. Because I'll be honest, there's a LOT I had forgotten that I covered within the past year of nursing school. This book brought me up to date on all the specific conditions and treatments within just 3 1/2 days.

So anyway. It did its job. And again, to those in nursing school: the details ARE important and you won't gain understanding of the BIG concepts through this book. You learn that in school. This is a review. Not a substitute for messing around in nursing school for 2 years and then deciding you want to learn the material

to pass NCLEX.

I wish you all the best in your future careers. Nurse on!
